

## Giving Up is No Option

This book is about connecting your passions in life with your purpose for being here on this earth. Each one of us has been given certain gifts and talents to share with the world and if we do not use these gifts we begin to feel frustrated and discontent with what we are doing. No one wakes up in the morning and tells themselves today I want to be a failure, everyone of us has a desire to succeed in life. The dilemma is that we never truly take time to find out what it is inside of us, that's calling to live. You have the ability to begin to do what you love to do and love what you do and just happen to be paid for it. God created us to become creators, thinkers, designers, inspirers and adventurous. It's time to be bold and move on the ideas that you have and give them to the world where they belong. Do not take them to one of the richest places on earth, the graveyard, and deprive the world of your change-making ideas that were supposed to help change someone else's life. Other people are depending on you to unleash your capabilities and maybe save another's life that you don't even know. The information in this book helps you to find that capability. In order to achieve, you gotta believe and never deceive the capability of any possibility for versatility is the best ability. It's not to change who you are, but to add on who you want to become. Only you know that.
