

Excerpt from Across Asia on a Bicycle the Journey of Two American Students, From Constantinople to Peking This volume is made up of a series of sketches describing the most interesting part of a bicycle journey around the world, - our ride across Asia. We were actuated by no desire to make a record in bicycle travel, although we covered 15, 044 miles on the wheel, the longest continuous land journey ever made around the world. The day after we were graduated at Washington University, St. Louis, Mo., we left for New York. Thence we sailed for Liverpool on June 23, 1890. Just three years afterward, lacking twenty days, we rolled into New York on our wheels, having put a girdle round the earth. Our bicycling experience began at Liverpool. After following many of the beaten lines of travel in the British Isles we arrived in London, where we formed our plans for traveling across Europe, Asia, and America. The most dangerous regions to be traversed in such a journey, we were told, were western China, the Desert of Gobi, and central China. Never since the days of Marco Polo had a European traveler succeeded in crossing the Chinese empire from the west to Peking. Crossing the Channel, we rode through Normandy to Paris, across the lowlands of western France to Bordeaux, eastward over the Lesser Alps to Marseilles, and along the Riviera into Italy. After visiting every important city on the peninsula, we left Italy at Brindisi on the last day of 1890 for Corfu, in Greece.
