

What Do You Think?: Change your mind about your child, his education, and yourself

Connecting with and educating a child with an Autism spectrum disorder is daunting, but it doesn't have to be disastrous. If you are a parent of a child living with Autism, changing your outlook on your child's life, education and, even, your own role in his life can make a dramatic difference. Matt Barfield has learned some lessons as he attempted to connect with his Autistic son. From Matt's successes and failures, you can gain inspiration, insight, and, perhaps, a few ideas on how to help your own child. This brief book is both actionable and hopeful. Let Matt's experiences encourage you as you encourage your child.
