

## Noticing Nature

A rocky hillside reveals the history and destiny of the universe. The drama of predator and prey plays out in a city park. A common typographical error brings you nose to nose with a wild deer. In the pages of *Noticing Nature*, you will see the natural world with new eyes and learn to notice the miracles disguised within the ordinary. Gather round the campfire and pull up a log to sit on. Make yourself comfortable, because Chuck Bonner has dozens of stories to tell that will make you laugh, and make you think, and make you wonder why you never noticed nature before.
