

Europes Network Industries: Conflicting Priorities: Monitoring European Deregulation 1

This report is the first in a new series, Monitoring European Deregulation (MED), launched by CEPR and SNS Forlag in 1997. The MED Reports feature new, policy-oriented research on the liberalization of the European markets of the major network industries: telecommunications, energy, air transportation, rail, and water. Addressed to a wide audience of both academics and European decisionmakers in the private-sector and policy communities, at both the national and EU level, the series will play an important role in informing the policy debate and influencing current thinking on these issues.
