

## Meditation: An Outline for Practical Study

Written after a lifelong study of the matter and based on experience, Meditation opens a new realm in human consciousness, to be appreciated by all those who believe that continuing spiritual and intellectual progress is needful to enrich our daily lives. Apart from providing material for study, the inestimable value of the book lies in the way in which it treats the subject from every possible angle and from an interdenominational approach. In this way, adherents of any religion or any philosophic system will not fail to find suitable themes and instructions. Initiatory teachings about the mind, its workings and possibilities; the origin and control of the thinking processes; human destiny and the true aim of life, are accompanied by a logical and scientific exposition of those exercises needed for the development of the meditative process. In brief, many will find Meditation the work for which they have been seeking and longing ever since they realized the necessity for taking their destiny into their own hands.
