

The Birdwatchers Year

This is a month-by-month guide to which birds to watch and when. The book illustrates the species most fascinating to observe in each month of the year, their behaviour and habitats. Illustrations accompany the descriptions of key birds to watch in Britain's varied habitats, from mountains and moorlands to woodlands and fields, lakes and rivers to cliffs and estuaries. A special bird of the month is featured in each chapter as well as key events in the birdwatchers year such as moulting and migration.
